

# SENOK AIR AMBULANCE SERVICE

**SENOK**  
**AIR**

**SAVE** TIME  
LIFE

# WHAT MAKES US **SAFER** THAN OTHERS

Air Senok is the only full time air ambulance company in Sri Lanka that owns and operate their own aircraft.

The only approved company to conduct Medevac services in Sri Lanka and conducted more than 65 medical evacuations.

We provide seamless bed-to-bed medical transportation and can link ground and air ambulance services, ensuring continuity of care.

All our air ambulances have real time tracking system that enables us to provide not only the receiving facility accurate time of arrival but also let family members know the status of their love ones.

Our experience ensures every aspect of the repatriation from the medical staff to the ground ambulance is always dictated by the medical requirements of the patient.

As a result every client, from major insurance companies to private individuals, receive the same professional service in the most appropriate, and most comfortable, aircraft available in Sri Lanka.

# MEDICAL SERVICES ARE PROVIDED BY AIR SENOK

- + Patient transfer to Medical Facility from any location
- + Medical Standby
- + Hospital to Hospital transfer
- + Medical Logistical support

Whatever the size of your medical cargo, if the cargo is time critical and you want to be confident it will arrive on time, then call

**Senok Air Ambulance Now**

## 1 You Call

This is where it all starts, on standby 24 hours a day 7 days a week and 365 days in a year our agents are ready to take your calls and emails. Once we receive the request or inquiry we immediately give our partners and clients available options that would fit their needs, requirements and budget.

## 2 We coordinate

Our medical coordinator will consult with the patient's physician to determine "fit-to-fly" status, the departing and receiving facility to reserve a bed and the patient's insurance or healthcare provider to confirm coverage and obtain prior transport authorization.

## 3 We Transport

this medical airlift service offers intensive healthcare assistance from point of origin to a receiving facility providing better medical management.
